Downloading the Software From SupportNet	2
Quick Install for Windows	2
Quick Install for Unix/Linux	3
Support Information	4

For additional reference while loading software, Mentor Graphics provides key system documentation on the install CD/DVD and on SupportNet.

## Before You Begin Installation

The following are pre-requisites to the Mentor Graphics product installation.

1. Order software licenses from Mentor Graphics. Licensing should be installed prior to running application software.
2. Check system requirements. For current system requirements, refer to the SupportNet **Download** tab for this release. The release documents are located in the *release\_documents* directory on the application DVD/CD ROM or from SupportNet. Additionally, the following web site on SupportNet lists all supported system configurations:

<http://supportnet.mentor.com/systemreqs/index.cfm>

## Ordering Licenses

New users must order software licenses prior to installing Mentor Graphics software. To order licenses, contact your local Mentor Graphics sales office. They can provide you with information on the number of node-locked and floating licenses your company purchased and any current license sever configurations you may have. You must provide them with:

- Any new license server configuration
- The host ID numbers of client and license server workstations for node-locked licenses
- The host ID number of the license server workstation for all floating licenses

Existing customers are reminded that your licensing report is available at the SupportNet web site (<http://supportnet.mentor.com/myaccount>), then choose the **Licenses** tab.

**Note:** The Customer Support web site requires a login and password. To register and obtain a password, go to <http://supportnet.mentor.com/user/register.cfm>. If you have difficulties, email [csd\\_registration@mentor.com](mailto:csd_registration@mentor.com). If you are registered, but have forgotten your password, go to [http://supportnet.mentor.com/user/forgot\\_password.cfm](http://supportnet.mentor.com/user/forgot_password.cfm).

---

## Installing and Configuring Licensing

All Mentor Graphics products require licensing to be installed and configured properly before invoking and operating them. It is recommended that licensing be installed before installing applications. For more licensing information, refer to the **Download** tab on SupportNet or the *release\_documents* directory at the top level of the DVD/CD for the following documents:

- *Licensing Mentor Graphics Software* (mgc\_licen.pdf)
- *Release Notes for Licensing Mentor Graphics Software* (mgc\_lic\_rn.pdf)
- *License Administration Guide* (flexnet\_admin.pdf)

## Downloading the Software From SupportNet

1. Create a BridgePoint\_4.1.12 download directory on your computer. Change to that directory. Note that if you choose to name the directory differently, the name must not contain Unicode characters.
2. Using a web browser, log on to the Mentor Graphics SupportNet.
3. Click the **Downloads** tab.
4. In the “My Products” field, choose BridgePoint.
5. In the “Selected Release” field, choose BridgePoint 4.1.12.
6. Read the Software Terms and Conditions and select **I Agree** at the bottom before downloading the software.
7. Select the **FTP Download** button associated with the desired release platform in the highlighted box.
8. Save the file to the directory created in step 1 above.
9. Follow the instructions listed in “Quick Install for Windows” or “Quick Install for UNIX/Linux”.

## Quick Install for Windows

1. Navigate to the directory where you downloaded the release to. Execute the downloaded EXE to start the install program.

Alternatively, if you are installing from DVD/CD ROM, insert the disc into your drive. If the installation does not automatically start, select **Start > Run**, specify the DVD/CD ROM drive letter and install executable (for example *D:\setup.exe*) and click **OK**.

---

**Note:** You must have Administrator privileges to install the software product on Windows systems.

2. Read the license agreement and click **Agree** to accept.
3. Choose your install set, either BridgePoint with Eclipse or just BridgePoint. Click **Next**.
4. If you selected BridgePoint with Eclipse:
  - a. Specify the target location by typing the path in the target location field or click **Browse** to select the target directory. Click **Next**.
5. If you selected BridgePoint:
  - a. Specify the existing eclipse location by typing the path in the eclipse location field or click **Browse** to select the eclipse directory. Click **Next**.
  - b. Specify the target path in the target location field or click **Browse** to select the target directory. Click **Next**.
6. If an existing BridgePoint is found at the target location, choose **Yes** or **No** to overwrite the existing version.
7. Indicate if you want to create a desktop shortcut by choosing **Yes** or **No**.
8. Click **OK** when the installation is complete.
9. Launching BridgePoint:
  - a. Use the desktop icon
  - b. Or, `<install path>\eclipse\Launcher.bat`

## Quick Install for Unix/Linux

1. If installing from DVD/CD ROM, follow the instructions here to mount the DVD/CD ROM. If installing from a downloaded Release, proceed to Step 2.

**Note:** Mounting and unmounting the DVD/CD ROM on UNIX systems requires “root” privileges. However, installing the application software does not require “root” privileges.

- To mount the DVD/CD ROM on Linux, do the following:
  - a. Insert the Volume 1 DVD/CD into the DVD/CD ROM drive.
  - b. If necessary, create a mount point (directory) for your DVD/CD ROM device.
  - c. Mount the DVD/CD ROM. The following table shows command-line examples for the supported operating systems. Substitute the SCSI address for the value of “x”.

Operating System	Use These UNIX Commands
------------------	-------------------------

---

Linux	<code>mount -t iso9660 /dev/cdrom /mnt/cdrom</code>
-------	---

2. Navigate to the directory where you downloaded the release to or `/cdrom` as appropriate. Execute the IXL to start the install program.
3. Read the license agreement and click **Agree** to accept.
4. Specify the target location by typing the path in the target location field or click **Browse** to select the target directory. Click **Next**.
5. If an existing BridgePoint is found at the target location, choose **Yes** or **No** to overwrite the existing version.
6. Click **OK** when the installation is complete.
7. Launching BridgePoint: `<install path>\eclipse\Launcher.sh`

## Support Information

If you have questions about this software release, please log in to SupportNet. You may search thousands of technical solutions, view documentation, or open a Service Request online at:

<http://supportnet.mentor.com/>

If your site is under current support and you do not have a SupportNet login, you may easily register for SupportNet by filling out the short form at:

<http://supportnet.mentor.com/user/register.cfm>

All customer support contact information can be found on our web site at:
